ACADEMIC PROJECT (THIRD YEAR) :

Title: Automatic Irrigation System with Message Alert

Description:

In farming, irrigation is the most important factor. This project basically works on the moisture content of the soil. It controls the amount of water which reaches the plants. It could be

effectively used to water the plants when they need it.

INDUSTRIAL PROJECT :

Title: Intelligent Card-Credit Card Onboarding

Description:

The Customer experience becomes imperative in any touch point with the bank. To have a seamless experience while the Customer applies for a Credit Card, right from the time of applying and all the way till approval, and customer notification, is the predominant objective behind the need to have an online Credit Card Onboarding application. This proposed application will provide quick response to the customer as compared to the traditional way. This will significantly save tremendous amount of time for the customers as well as the credit card underwriters/approvers.
